Investment / Performance Objectives & policy

The investment objective of the Sub-fund is to provide capital growth by achieving a return after fees in excess of the return of the JPMorgan GBI EM Global Diversified Index® over any five-year period. The Sub-fund will seek to achieve its investment objective by typically investing 80% (and, in any case, at least 51%) of its net assets, directly or through derivatives of any kind, in debt and debt-related instruments of any kind, including for example bonds and money market instruments, denominated in any local currency, issued by governments and their agencies located in or constituted under the laws of the emerging countries, including those with a Speculative (from BB+ to BB-), Highly Speculative (from B+ to B-) or Extremely Speculative (< B-) Grade credit rating, at issue or issuer level. The investments in securities, traded on markets that cannot be characterized as securities markets or regulated markets, which operate regularly and that are recognized and open to the public within the meaning of Article 50(1) of the UCITS Directive, will be treated as investments in unlisted securities or securities that are not traded on a regulated market that operates regularly and that is recognized and open to the public, and therefore they may not, together with any other unlisted securities or securities not traded on a regulated market that operates regularly and that is recognized and open to the public, exceed 10% of the Sub-fund's net assets. Typically 10% (and, in any case, no more than 30%) of the Sub-fund's net assets will be invested in Extremely Speculative (< B-) instruments and instruments not rated by any credit rating agency established in the European Union and registered in accordance with the CRA Regulation, at the time of purchase, at issue or issuer level. In any case, the Sub-fund will not invest more than 10% of its net assets in Distressed Debt Securities. Typically 25% (and, in any case, no more than 49%) of the Sub-fund's net assets will be invested in any other instruments, such as but not limited to other debt and debt-related instruments of any kind, including those issued by corporate issuers, UCITS (up to 10%) and cash, including term deposits with credit institutions, within the limits permitted by law and indicated in the prospectus. The Sub-fund may invest up to 10% of its net assets in contingent convertible bonds. The Sub-fund's net assets may be invested in asset-backed securities (up to 10%), including asset-backed Sukuk, through dedicated investment funds. Your attention is called to the fact that this Sub-fund may invest in the Russian market, notably the Moscow Exchange, and directly or indirectly through the Bond Connect program in the China Interbank Bond Market (CIBM). The Sub-Fund may use derivatives financial instruments aiming at hedging risks, ensuring efficient portfolio management and/or investing according to the Investment Policy. The use of derivatives financial instruments for investment purposes may amplify the up and down fluctuations of the Sub-Fund's Net Asset Value per Unit.

For more information read the Prospectus or Key Investor Information Document (KIID).
